INTERPRETATION AND DEFINITIONS FOR STANDING ORDERS AND STANDING FINANCIAL INSTRUCTIONS

Introduction

Within the Terms of Authorisation issued by the Independent Regulator - NHS England (NHSE), the statutory entity that regulates NHS Foundation Trusts, NHS Foundation Trusts are required to demonstrate appropriate arrangements to provide comprehensive governance arrangements in accordance with the Health and Social Care (Community Health and Standards) Act 2008.

Standing Orders (SOs) regulate the proceedings and business of the Trust and are part of its corporate governance arrangements. In addition, as part of accepted Codes of Conduct and Accountability arrangements, boards are expected to adopt schedules of reservation of powers and delegation of powers. These schedules are incorporated within the Trust's Scheme of Delegation.

These documents, together with Standing Financial Instructions, Standards of Business Conduct and Managing Declarations of Interests Policy for NHS Staff, Budgetary Control Procedures, the Anti Bribery Policy and the procedures for the Declaration of Interest provide a regulatory framework for the business conduct of the Trust. They fulfil the dual role of protecting the Trust's interests and protecting staff from possible accusation that they have acted less than properly.

The Standing Orders, Scheme of Delegation, Standing Financial Instructions and Budget Manual provide a comprehensive business framework that is to be applied to all activities, including those of the Charitable Foundation. Members of the Trust Board and all members of staff should be aware of the existence of and work to these documents.

These documents apply to all activities of the Trust and specifically including commissioning activities undertaken via the Provider Collaborative which should follow the same principles as the Trust who has the overall responsibility for the reporting arrangements.

The Constitution, 2006 Act and the Code of Conduct and Accountability requires Trust Directors to declare interests which are relevant and material to the NHS Board of which they are a member. All existing Board Directors should declare such interests.

Any Directors appointed subsequently should do so on appointment. It is a condition of employment that those holding director or director-equivalent posts provide confirmation in writing, on appointment and thereafter on demand, of their fitness to hold such posts. Fitness to hold such a post is determined in a number of ways, including (but not exclusively) by the Trust's Provider Licence, the Health & Social Care Act 2012 (Regulated Activities) Regulation, and the Trust's Constitution.

7.1.2 Interests which are Relevant and Material

Interests which should be regarded as "relevant and material" are:

- a) Directorships, including Non-Executive Directorships held in private companies or PLCs (with the exception of those of dormant companies);

Any member of the Trust Board who comes to know that the Trust has entered into or proposes to enter into a contract in which he/she or any person connected with him/her (as defined in Standing Order 7.3 and elsewhere) has any pecuniary interest, direct or indirect, the Trust Board member shall declare his/her interest by giving notice in writing of such fact to the Trust as soon as practicable.

7.1.3 Advice on Interests

If Trust Board members have any doubt about the relevance of an interest, this should be discussed with the Chair of the Trust, or with the Trust Secretary.

Financial Reporting Standard No 8 (issued by the Accounting Standards Board) specifies that influence rather than the immediacy of the relationship is more important in assessing the relevance of an interest. The interests of partners in professional partnerships including general practitioners should also be considered.

7.1.4 Recording of Interests in Trust Board Minutes

At the time Directors' interests are declared, they should be recorded in the Board minutes. Any changes in interests should be declared at the next Board meeting following the change occurring and recorded in the minutes of that meeting.

7.2.1 The Chief Executive will ensure that a Register of Interests is established to record formally declarations of interests of Trust Board. In particular the Register will include details of all directorships and other relevant and material interests (as defined in SO 7.1.2) which have been declared by both Executive and Non-Executive Trust Board members.

7.3.1 Definition of Terms used in Interpreting 'Pecuniary' Interest

For the sake of clarity, the following definition of terms is to be used in interpreting this Standing Order:

- (i) "spouse" shall include any person who lives with another person in the same household (and any pecuniary interest of one spouse shall, if known to the other spouse, be deemed to be an interest of that other spouse);
- (ii) "contract" shall include any proposed contract or other course of dealing.
- (iii) "Pecuniary interest"

Formal tendering procedures **need not be applied** where:

- (a) the estimated expenditure or income does not, or is not reasonably expected to, exceed the threshold for tendering as set out in the Scheme of Delegation;
- (b) where the supply is proposed under special arrangements negotiated by NHS England in which event the said special arrangements must be complied with;
- (c) regarding disposals as set out in SFI 24;
- (d) the Trust is entitled to call off from a Framework Agreement and the requirements of SFI 21.1.2 (Use of Framework Agreements) have been

Formal tendering procedures **may be waived** in the following circumstances:

- f) in very exceptional circumstances where the Chief Executive decides that formal tendering procedures would not be practicable or the estimated expenditure or income would not warrant formal tendering procedures, and the circumstances are detailed in an appropriate Trust record;
- (g) where the requirement is covered by an existing contract;
- (h) where a Consortium arrangement is in place and a lead organisation has been appointed to carry out tendering activity on behalf of the Consortium members;

- (j) where specialist expertise is required and is available from only one source;
- (k) when the task is essential to complete the project, and arises as a consequence of a recently completed assignment and engaging different consultants for the new task would be inappropriate;

when the goods required by the Trust are a partial replacement for, or in addition to, existing goods and to obtain the goods from a supplier other than the supplier who supplied the existing goods would oblige the Trust to acquire goods with different technical characteristics and this would result in:

- incompatibility with the existing goods; or
- disproportionate technical difficulty in the operation and maintenance of the existing goods;

but no such contract may be entered in for a duration of more than three years;

- (l) there is a clear benefit to be gained from maintaining continuity with an earlier project. However, in such cases the benefits of such continuity must outweigh any potential financial advantage to be gained by competitive tendering;

when works or services required by the Trust are additional to works or services already contracted for but for unforeseen circumstances such additional works or services have become necessary and that such additional works or services:

- cannot for technical or economic reasons be carried out separately from the works or services under the original contract without major inconvenience to the Trust; or

The Director of Finance will ensure that any fees paid are reasonable and within commonly accepted rates for the costing of such work.

- (n) where allowed and provided for in the Capital Investment Manual.

The waiving of competitive tendering procedures should not be used to avoid competition or for administrative convenience or to award further work to a consultant originally appointed through a competitive procedure.

Where it is decided that competitive tendering is not applicable and should be waived, the fact of the waiver and the reasons should be documented and recorded on a Tender waiver form which must be completed by Procurement, signed by the Chief Executive and reported to the Audit Committee at each meeting.

- (o) Where subcontracting arrangements arise following successful joint tender applications with partner organisations or where contracting arrangements/requirements are inherited under a Lead Provider arrangement.

16.6.3 Fair and Adequate Competition

Where the exceptions set out in SFI Nos. 16.1 and 16.8.3 apply, the Trust shall ensure that invitations to tender are sent to a sufficient number of firms/individuals to provide fair and adequate competition as appropriate having regard to their capacity to supply the goods or materials or to undertake the services or works required. The appropriate numbers are set out in the Scheme of Delegation

16.6.4 Equality of Treatment

The Trust shall ensure that no sector of any market (public, private, third sector/social enterprise) is given an unfair advantage in the design or conduct of any tender process.

16.6.5 Non-Discrimination

- (a) The subject matter and the scope of the contract opportunity should be described in a non-discriminatory manner. The Trust should utilise generic and/or descriptive terms, rather than the trade names of particular products or processes or their manufacturers or their suppliers.

- (b) All participants in a tender process should be treated equally and all rules governing a tender process must apply equally to all participants.

16.6.6 Building and Engineering Construction Works

The Trust shall ensure that firms/individuals invited to tender for building and engineering construction work, where this is not contrary to the Directives by the Council of the European Union (see Scheme of Delegation) are among those on approved lists or have been openly advertised in accordance with EU Procurement and UK legislation.

Competitive Tendering cannot be waived for building and engineering construction works and maintenance (other than in accordance with Concode) without Departmental of Health approval.

16.6.7 Items which Subsequently Breach Thresholds after Original Approval

Items estimated to be below the limits set in this Standing Financial Instruction for which formal tendering procedures are not used which subsequently prove to have a value above such limits shall be reported to the Chief Executive and be recorded in an appropriate Trust record.

16.6.8 Advertisement of Contract Opportunities

Where a formal tender process is required under SFI 16.4 then:

(a) where a contract opportunity falls within the Regulations and a process compliant with the Regulations is required, a relevant notice should be utilised; or

(b) Where a contract opportunity does not fall within the Regulations the Trust shall utilise a form of advertising for such contract opportunity that is sufficient to enable potential providers to access appropriate information about the contract opportunity so as to be in a position to express an interest; and

16.6.9 Choice of Procedure

(a) Where a contract opportunity falls within the Public Contract Regulations and a process compliant with the Public Contract Regulations is required then the Trust shall utilise an available tender procedure under the Public Contract Regulations.

(b) In all other cases the Trust shall utilise a tender procedure proportionate to the value, complexity and risk of the contract opportunity and shall ensure that invitations to tender are sent to a sufficient number of providers to provide fair and adequate competition (in any event no less than two).

- (d) Every tender for building or engineering works (except for maintenance work, when Estmancode guidance shall be followed) shall embody or be in the terms of the current edition of one of the Joint Contracts Tribunal Standard Forms of Building Contract or Department of the Environment (GC/Wks) Standard forms of contract amended to comply with Concode; or, when the content of the work is primarily engineering, the General Conditions of Contract recommended by the Institution of Mechanical and Electrical Engineers and the Association of Consulting Engineers (Form A), or (in the case of civil engineering work) the General Conditions of Contract recommended by the Institute of Civil Engineers, the Association of Consulting Engineers and the Federation of Civil Engineering Contractors. (Standing Order No. 16.7.5 below).

16.7.4 Admissibility of Tenders

- (a) If for any reason the designated officers are of the opinion that the tenders received are not strictly competitive (for example, because their numbers are

insufficient or any are amended, incomplete or qualified) no contract shall be awarded without the approval of the Chief Executive.

- (b) Where only one tender is sought and/or received, the Chief Executive and Director of Finance shall, as far practicable, ensure that the price to be paid is fair and reasonable and will ensure value for money for the Trust.

16.7.5 Late Tenders

- (a) Tenders received after the due time and date, but prior to the opening of the other tenders, may be considered only if the Chief Executive or his nominated officer decides that there are exceptional circumstances i.e. dispatched in good time but delayed through no fault of the tenderer.

It is accepted that for professional services such as management consultancy, the lowest price does not always represent the best value for money. Other factors affecting the success of a project include:

- (i) experience and qualifications of team members;
- (ii) understanding of client's needs;
- (iii) feasibility and credibility of proposed approach;
- (iv) ability to complete the project on time.

Where other factors are taken into account in selecting a tenderer, these must be clearly recorded and documented in the contract file, and the reason(s) for not accepting the lowest tender clearly stated.

- (e) No tender shall be accepted which will commit expenditure in excess of that which has been allocated by the Trust and which is not in accordance with these Instructions except with the authorisation of the Chief Executive.

 - (ii) All tenders should, subject to compliance with the provisions of the Freedom of Information Act 2000, be kept confidential and should be retained for 12 months from the date set for the receipt of tenders for inspection.
- (f) The use of these procedures must demonstrate that the award of the contract was:
 - (i) not in excess of the going market rate / price current at the time the contract was awarded;
 - (ii) that best value for money was achieved.
- (g) All tenders should be treated as confidential and should be retained for inspection.

- (h) All tendering activity carried out through e-tendering should be compliant with Trust policies and procedures. Issue of all tender documentation will be done electronically through a secure website with controlled access using secure login, authentication and viewing rules. All tenders will be received into a secure vault so that they cannot be accessed until an agreed opening time.

16.7.8 Tender Reports to the Board

Reports to the Board will be made on an exceptional circumstance basis only.

16.7.9 Monitoring and Audit of Decision to Tender

- (a) The waiving of competitive tendering procedures should not be used with the object of avoiding competition or solely for administrative convenience or subject to SFIs 16.8.2 to award further work to a provider originally appointed through a competitive procedure.
- (b) Where it is decided that competitive tendering need not be applied or should be waived, the fact of the non application or waiver and the reasons for it should be documented and recorded in an appropriate Trust record and reported to the Audit Committee at each meeting.
- (c) Where the Trust proposes not to conduct a tender process in relation to a contract opportunity for a new health care service or a significantly changed health care service then the Trust shall consider such proposal at a meeting of the Board as recommended by the Trust Procurement Guide

16.7.10 List of Approved Firms for Building and Engineering Construction Works

The Trust does not hold a physical approved contractors list as it uses general open tendering principles the same as for all other tenders created. Where relevant the Trust may use the services of construction industry standards such as Constructionline or YORBuild to pre approve contractors to bid for work.

16.7.11 Checks to be Undertaken When Not Using Approved Lists

Where a contract (and where appropriate a quote) is to be awarded to a contractor who is not on an approved list there should be appropriate checks to ensure that the Contractor is technically competent, financially secure and where appropriate that they comply with any appropriate equalities and health and safety legislation.

16.7.12 Contracts for Building or Engineering Works

- (a) Subject to SFIs 16.7.9(b) inclusive, every contract for building or engineering works shall embody or be in the terms of the current edition of one of the Joint Contracts Tribunal Standard Forms of Building Contract or Department of the Environment (GC/Wks) Standard forms of contract amended to comply with Concode.
- (b) When the content of the work is primarily engineering every contract shall embody or be in the terms of:
- the General Conditions of Contract recommended by the Institution of Mechanical Engineers; and/or
 - the Association for Consultancy and Engineering (Form A);
- (c) In the case of civil engineering work every contract shall embody or be in the terms of the General Conditions of Contract recommended by:

- the Institution of Civil Engineers; and/or
- the Association for Consultancy and Engineering; and/or
- the Civil Engineering Contractors Association.

(d) Each of the documents referred to in SFI 16.7.12 (a) to (c) inclusive may be modified and/or amplified to accord with Department of Health guidance and, with appropriate professional advice (including legal advice if necessary), to cover special features of individual projects.

16.8 Quotations: Competitive and Non-Competitive

16.8.1 General Position on Quotations

Quotations for goods and non-health care services are required where formal tendering procedures are not adopted and where the intended expenditure exceeds the threshold set out in the Scheme of Delegation.

16.8.2 Competitive Quotations

- Quotations should be obtained from up to 5 firms/individuals based on Scheme of Delegation prepared by the Trust.
- Quotations should be in writing unless the Chief Executive or his nominated officer determines that it is impractical to do so in which case quotations may be obtained by telephone. Confirmation of telephone quotations should be obtained as soon as possible and the reasons why the telephone quotation was obtained should be set out in a permanent record.
- All quotations should be treated as confidential and should be retained for inspection.
- The Chief Executive or his nominated officer should evaluate the quotation and select the quote which gives the best value for money. If this is not the lowest quotation if payment is to be made by the Trust, or the highest if payment is to be received by the Trust, then the choice made and the reasons why should be recorded in a permanent record.

16.8.3 Non-Competitive Quotations

Non-competitive quotations in writing may be obtained in the following circumstances:

- the supply of proprietary or other goods of a special character and the rendering of non-health care services of a special character, for which it is not, in the opinion of the responsible officer, possible or desirable to obtain competitive quotations;
- the supply of goods or manufactured articles of any kind which are required quickly and are not obtainable under existing contracts;
- miscellaneous services, supplies and disposals;
- where the goods or services are for building and engineering maintenance the responsible works manager must certify that the first two conditions of this SFI (i.e.: (a) and (b) of this SFI) apply.

16.8.4 Quotations to be within Financial Limits

No quotation shall be accepted which will commit expenditure in excess of that which has been allocated by the Trust and which is not in accordance with Standing Financial Instructions except with the authorisation of either the Chief Executive or Director of Finance.

16.9 Evaluation of Tenders and Quotations

16.9.1 Overriding Duty to Achieve Best Value

The Trust shall ensure that it seeks to obtain best value for each contract opportunity.

16.9.2 Choice of Evaluation Methodology

The Trust must for each contract opportunity which is subject to a tender or a competitive quotation choose to adopt evaluation criteria based on either:

- (a) the lowest price; or
- (b) the most economically advantageous tender, based on criteria linked to the subject matter of the contract opportunity including but not limited to some or all of:

- quality;
- price;
- technical merit;
- aesthetic and functional characteristics;
- environmental characteristics;
- running costs;
- cost effectiveness;
- after sales service;
- technical assistance;
- delivery date;
- delivery period; and/or
- period of completion

- c) Each invitation to tender or invitation to supply a competitive quotation must state the evaluation criteria to be used to evaluate the tender or quotation and the relative weightings of each such criteria.

16.9.3 Authorisation of Tenders and Competitive Quotations

Providing all the conditions and circumstances set out in these Standing Financial Instructions have been fully complied with, formal authorisation and awarding of a contract will be decided as specified in Scheme of Delegation.

Formal authorisation must be put in writing. In the case of authorisation by the Board this shall be recorded in their minutes.

16.9.4 Form of Contract: General

Subject to the remainder of SFI 16.9.5 below the Trust shall consider the most applicable form of contract for each contract opportunity (including to the extent appropriate any NHS Standard Contract Conditions available) and should consider obtaining support from a suitably qualified professional advisor (including where appropriate legal advisors).

16.9.5 Statutory Requirements

The Trust must ensure that all contracts that are governed by mandatory statutory requirements (whether contained in Statute, Regulations or directions) comply with such requirements. Such contracts include, but may not be limited to:

- (a) GMS contracts;
- (b) PMS agreements;
- (c) SPMS contracts;
- (d) APMS contracts;

- (e) PCTMS contracts;
- (f) PDS agreements;
- (g) PCTDS contracts;
- (h) GDS contracts;
- (i) GOS contracts (mandatory and/or additional services contract)

16.10 Private Finance for Capital Procurement (See also SFI 22.2)

The Trust should normally market-test for PFI (Private Finance Initiative funding) when considering a capital procurement. When the Trust Board proposes, or is required, to use finance provided by the private sector the following should apply:

- (a) The Chief Executive shall demonstrate that the use of private finance represents value for money and genuinely transfers risk to the private sector.
- (b) Where the sum exceeds delegated limits, a business case must be referred to the appropriate Department of Health for approval or treated as per current guidelines.
- (c) The proposal must be specifically agreed by the Board.
- (d) The selection of a contractor/finance company must be on the basis of competitive tendering or quotations.

16.11 Compliance Requirements for all Contracts

The Trust Board may only enter into contracts on behalf of the Trust within the statutory powers delegated to it by the Secretary of State and shall comply with:

- (a) The Trust's Standing Orders and Standing Financial Instructions;
- (b)
- (c) any relevant directions including the Capital Investment Manual, Estate code and guidance on the Procurement and Management of Consultants;
- (d) such of the NHS Standard Contract Conditions as are applicable.
- (e) contracts with Foundation Trusts must be in a form compliant with appropriate NHS guidance.
- (f) Where appropriate contracts shall be in or embody the same terms and conditions of contract as was the basis on which tenders or quotations were invited.
- (g) In all contracts made by the Trust, the Board shall endeavour to obtain best value for money by use of all systems in place. The Chief Executive shall nominate an officer who shall oversee and manage each contract on behalf of the Trust.
- (h) In all contracts made by the Trust, the tendered value of the winning contract should not be exceeded. If, in the course of the contract, the tendered value is required to be exceeded then, prior to any agreement to vary the value, authorisation must be obtained by the relevant Director in charge of the business area. In the case of a capital contract, this agreement must be provided from the Capital and Redesign Group prior to any agreement being made. In all

instances this agreement should only be sought when all other mitigating options have been explored.

16.12 Personnel and Agency or Temporary Staff Contracts

The Chief Executive shall nominate officers with delegated authority to enter into contracts of employment, regarding staff, agency staff or temporary staff service contracts.

16.13 Disposals (See overlap with SFI 24)

Competitive Tendering or Quotation procedures shall not apply to the disposal of:

- (a) any matter in respect of which a fair price can be obtained only by negotiation or sale by auction as determined (or pre-determined in a reserve) by the Chief Executive or his nominated officer;
- (b) obsolete or condemned articles and stores, which may be disposed of in accordance with the supplies policy of the Trust;
- (c) items to be disposed of with an estimated sale value below the threshold detailed in Scheme of Delegation;
- (d) items arising from works of construction, demolition or site clearance, which should be dealt with in accordance with the relevant contract;
- (e) land or buildings concerning which Department of Health guidance has been issued but subject to compliance with such guidance.

16.14 In-house Services

16.14.1 The Chief Executive shall be responsible for ensuring that best value for money can be demonstrated for all services provided on an in-house basis. The Trust may also determine from time to time that in-house services should be market tested by competitive tendering.

16.14.2 In all cases where the Board determines that in-house services should be subject to competitive tendering the following groups shall be set up:

- (a) Specification group, comprising the Chief Executive or nominated officer/s and specialist.
- (b) In-house tender group, comprising a nominee of the Chief Executive and technical support.
- (c) Evaluation team, comprising normally a specialist officer, a supplies officer and a Director of Finance representative. For services having a likely annual expenditure exceeding £750,000 a Non-Executive Trust Board member should be a member of the evaluation team.

16.14.3 All groups should work independently of each other and individual officers may be a member of more than one group but no member of the in-house tender group may participate in the evaluation of tenders.

16.14.4 The evaluation team shall make recommendations to the Board.

16.14.5 The Chief Executive shall nominate an officer to oversee and manage the contract on behalf of the Trust.

16.15 Applicability of SFIs on Tendering and Contracting to Funds Held in Trust (see also SFI 27)

These Instructions shall not only apply to expenditure from Exchequer funds but also to works, services and goods purchased from the Trust's trust funds and private resources.

17. PROCUREMENT OF HEALTH CARE SERVICES

17.1 Duty to Comply with Standing Orders and Standing Financial Instructions.

The procedure for making all contracts by or on behalf of the Trust shall comply with these Standing Financial Instructions (except where SO 3.13 is applied).

17.2 Legislation Governing Procurement of Health Care Services

(a) The Trust shall comply with the Health and Care Act 2022 and The Health Care Services (Provider Selection Regime) Regulations 2023. The Procurement Legislation as from time to time amended shall have effect as if incorporated in these Standing Orders and Standing Financial Instructions.

(b) The Trust should consider obtaining support from any suitably qualified professional advisor (including where appropriate legal advisors to ensure compliance with Procurement Legislation when engaging in tendering procedures.

(c) The Trust shall consider the application of any applicable duty to consult or engage the public or any relevant Overview and Scrutiny Committee of a Local Authority prior to commencing any procurement process for a contract opportunity.

17.3 The Provider Selection Regime (PSR)

17.3.1 How does the PSR work?

The PSR applied to the arrangement of health care and public health services arranged by relevant authorities and irrespective of who the provider is (i.e., whether the service is provided by NHS providers, other public sector bodies, local authorities, or providers within the voluntary, community, social enterprise (VCSE) and independent sectors). The PSR will not apply to goods and non-health care services (such as medicines, medical equipment, cleaning, catering, business consultancy services and social care), unless arranged as part of mixed procurement.

The Trust can follow three different provider selection processes to award contracts for health care services under the PSR:

1. direct award processes (direct award process A, direct award process B and direct award process C)
2. most suitable provider process
3. competitive process.

17.3.2 Making decisions under the PSR

The PSR decision-making processes are set out in Regulation 6. This regime must be applied whenever relevant authorities are making decisions about awarding contracts for health care services. The first step for relevant authorities applying this regime is to identify which of the following provider selection processes are applicable.

Direct award process A must be used when all of the following apply:

- there is an existing provider of the health care services to which the proposed contracting arrangements relate
- the relevant authority is satisfied that the health care services to which the proposed contracting arrangements relate are capable of being provided only by the existing provider (or group of providers) due to the nature of the health care services.

Direct award process A must not be used to conclude a framework agreement.

Direct award process B must be used when all of the following apply:

- the proposed contracting arrangements relate to health care services in respect of which a patient is offered a choice of provider
- the number of providers is not restricted by the relevant authority
- the relevant authority will offer contracts to all providers to whom an award can be made because they meet all requirements in relation to the provision of the health care services to patients
- the relevant authority has arrangements in place to enable providers to express an interest in providing the health care services.

Where relevant authorities are required to offer choice to patients under regulation 39 of the National Health Service Commissioning Board and Clinical Commissioning Groups (Responsibilities and Standing Rules) Regulations 2012, they cannot restrict the number of providers and therefore direct award process B must be followed.

Direct award process B must not be used to conclude a framework agreement.

Direct award process C may be used when all of the following apply:

- the relevant authority is not required to follow direct award processes A or B
- the term of an existing contract is due to expire and the relevant authority proposes a new contract to replace that existing contract at the end of its term
- the proposed contracting arrangements are not changing considerably
- the relevant authority is of the view that the existing provider (or group of providers) is satisfying the existing contract and will likely satisfy the proposed contract to a sufficient standard.

Direct award process C must not be used to conclude a framework agreement.

The most suitable provider process may be used when all of the following apply:

- the relevant authority is not required to follow direct award processes A or B
- the relevant authority cannot or does not wish to follow direct award process C
- the relevant authority is of the view, taking into account likely providers and all relevant information available to the relevant authority at the time, that it is likely to be able to identify the most suitable provider (without running a competitive process).

The most suitable provider process must not be used to conclude a framework agreement.

The competitive process must be used when all of the following apply:

- the relevant authority is not required to follow direct award processes A or B
- the relevant authority cannot or does not wish to follow direct award process C, and cannot or does not wish to follow the most suitable provider process.

The competitive process must be used if the relevant authority wishes to conclude a framework agreement.

Once the relevant authority has identified which of these circumstances applies and has identified the appropriate provider selection process to follow, it will then need to follow that provider selection process as set out in detail in the sections below.

Relevant authorities are expected to identify which provider selection process is applicable sufficiently in advance of a contract coming to an end. The fact that a particular decision-making approach was used to select a provider in the past does not mean the same approach must be used for that service in future.

It is permitted to make certain modifications during the term of a contract to allow for changes to services or circumstances. The section on [contract modifications](#) sets out the conditions and transparency requirements for these modifications. In limited circumstances relevant authorities may need to act rapidly, for example, to address immediate risks to patient or public safety, within which it would be impractical to follow the steps required under this regime. The section on [urgent awards or contract modifications](#) sets out these circumstances and how relevant authorities must act if they arise.

17.4 Provider Selection Processes

17.4.1 Direct award process A

The process that must be followed when awarding a contract under direct award process A is set out in Regulations 6(3) and 7.

The type of service means there is no realistic alternative to the current provider. This process must not be used to award contracts when establishing a new service.

Direct award process A must be used to award contracts to the existing provider (or group of providers) when the nature of the service means there is no realistic alternative to the existing provider (or group of providers). Even when there are alternative providers in the market, as long as these are not considered to be realistic alternatives for the relevant authority's specific requirements, direct award process A must be used to award a contract.

Such services may include, but are not limited to:

- Type 1 and 2 urgent and emergency services and associated emergency inpatient services
- 999 emergency ambulance services
- NHS urgent mental health crisis services
- services established as a commissioner requested services (CRS)*
- services provided by NHS trusts designated as 'essential services' in their NHS Standard Contract
- a service that is interdependent with, and cannot realistically be provided separately from, another service which only that provider can realistically provide (e.g., because of a need for cross-specialty or cross-service working).

*A service is established as a commissioner requested services (CRS) by following the processes set out in the provider licence (for foundation trusts or independent sector providers) or designated an 'essential service' under an NHS contract (for trusts). Relevant authorities are expected to periodically review CRS designations, in line with the [Guidance for commissioners on ensuring the continuity of health care services](#), as markets and alternative provision may evolve. Providers that have been designated to provide CRS can still be replaced if the relevant authority considers this to be appropriate.

Direct award process A must not be used to conclude a framework agreement or to award a contract based on a framework agreement.

17.4.2 Direct award process B

The process that must be followed when awarding a contract under direct award process B is set out in Regulations 6(4) and 8.

People have a choice of providers, and the number of providers is not restricted by the relevant authority.

Direct award process B must be used to award contracts to providers where people are offered a choice between providers and where the number of providers is not restricted by the relevant authority through provider selection. Services arranged using direct award process B may include, but are not limited to:

- elective services led by a consultant or mental health care professional where patients have a legal right to Choice (as set out in Part 8 of the National Health Service Commissioning Board and Clinical Commissioning Groups (Responsibilities and Standing Rules) Regulations 2012)
- other elective services where patients do not have a legal right to Choice, but for which relevant authorities voluntarily offer patients a choice of providers and where the number of providers is not restricted by the relevant authority through provider selection (e.g., mandatory eye health services, audiology, podiatry services, NHS continuing health care services, public health services such as over-forty health checks).

For some services where the number of providers is not restricted or cannot be restricted, the qualification criteria, which providers must meet, will apply, before a provider can be offered a contract. These criteria (which only apply to ICBs and NHS England) sit outside the PSR decision-making processes and are set out in the National Health Service Commissioning Board and Clinical Commissioning Groups (Responsibilities and Standing Rules) Regulations 2012 (as amended) and are explained in NHS England's Choice guidance.

When awarding a contract using direct award process B, relevant authorities must ensure that:

- arrangements are in place to enable providers to express an interest in providing the required services
- all providers that meet the requirements in relation to the provision of the health care services are offered contracts.

Relevant authorities must consider the exclusions in Regulation 20 and apply as appropriate.

Direct award process B must not be used to conclude a framework agreement or to award a contract based on a framework agreement.

The relevant transparency steps (see [transparency section](#) and [Annex B](#)) must be followed before contracts are awarded under this approach.

If relevant authorities are seeking to voluntarily establish other pools of providers from which patients can choose (i.e., for services where there is no legal right to choice) and they intend to select a limited number of providers to be available, they must use the most suitable provider process or the competitive process to make this selection.

17.4.3 Direct award process C

The process that must be followed when awarding a contract under the direct award process C is set out in Regulations 6(5) and 9.

The existing provider is satisfying the existing contract and likely to satisfy the new contract, and the proposed contracting arrangements are not changing considerably from the existing contract.

Direct award process C may be used to award a new contract to the existing provider (or group of providers), to replace an existing contract that is coming to an end, when all the tests below are met:

- the relevant authority is not required to follow direct award processes A or B
- the term of an existing contract is due to expire, and the relevant authority is proposing a new contract to replace that existing contract at the end of its term
- the proposed contracting arrangements are not changing considerably from the existing contract (see [establishing that a proposed contracting arrangement is not changing considerably](#))
- the relevant authority is of the view that the existing provider is satisfying the existing contract to a sufficient standard, according to the detail outlined in the contract, and also taking into account the key criteria and applying the basic selection criteria
- the relevant authority is of the view that the existing provider will likely satisfy the proposed contract to a sufficient standard taking into account the key criteria and applying the basic selection criteria
- the procurement is not to conclude a framework agreement or to award a contract based on a framework agreement.

Once the relevant authority has ascertained that it can use direct award process C, it must follow the below steps:

1. Publish a notice containing its intention to award the contract to the chosen provider (see [transparency](#)) and observe the standstill period (see [standstill period](#)).
2. Enter into a contract with the chosen provider after the standstill period has concluded.
3. Publish a notice confirming the award of the contract within 30 days of the contract being awarded.

Even where the proposed contracting arrangements are not changing considerably from the existing contract and the provider is satisfying the existing contract and will likely be able to satisfy the new contract, relevant authorities do not have to use direct award process C. Relevant authorities may still choose to follow the most suitable provider process or the [competitive process](#), for example because they wish to test the market. Relevant authorities must consider the exclusions in Regulation 20 and apply them as appropriate.

Establishing that the proposed contracting arrangements are not changing considerably from the existing contract

The considerable change threshold is set out in Regulation 6(10). Circumstances where a change does not meet the considerable change threshold are set out in Regulations 6(11) and 6(12).

To use direct award process C, the relevant authority must be satisfied that the requirements for the provision of health care services are not changing considerably, i.e., they don't meet the considerable change threshold as set out in Regulation 6(10).

Under this regime, the threshold for considerable change is met where the change:

a. renders the proposed contracting arrangements materially different in character to the existing contract when that existing contract was entered into

or:

b. meets all the following:

- the change, (to the proposed contracting arrangements as compared with the existing contract), is attributable to a decision made by the relevant authority
- the lifetime value of the proposed new contract is at least £500,000 higher (i.e., equal to or exceeding £500,000) than the lifetime value of the existing contract when it was entered into
- the lifetime value of the proposed new contract is at least 25% higher (i.e., equal to or exceeding 25%) than the original lifetime value of the existing contract when it was entered into.

The considerable change threshold is not met, where either:

- The material difference in character from the existing contract (when that existing contract was entered into) applies solely as a result of a change in the identity of the provider due to succession into the position of provider following corporate changes including takeover, merger, acquisition or insolvency and the relevant authority is satisfied that the provider meets the basic selection. Additionally, all of the following three conditions do not apply:
 - attributable to a decision of the relevant authority
 - the lifetime value of the proposed contracting is at least £500,000 or higher than the lifetime value of the existing contract when it was entered into
 - the lifetime value of the proposed new contract is at least 25% or higher than the original lifetime value of the existing contract when it was entered into.
- The proposed contracting arrangements are not materially different in character to the existing contract when that existing contract was entered into, and the following three points all apply:
 - the changes in the relevant health care services to which the proposed contracting arrangements relate (compared with the existing contract) are attributable to a decision of the relevant authority; however, that decision had to be made due to external factors beyond the control of the relevant authority or the provider, such as changes in patient or service user volume or changes in prices in accordance with a formula provided for in the contract document
 - the lifetime value of the proposed contracting arrangement is £500,000 or higher than the lifetime value of the existing contract when it was entered into
 - the lifetime value of the proposed new contract is 25% or higher (i.e., equal to or exceeding 25%) than the original lifetime value of the existing contract when it was entered into).

Lifetime value of a contract means the total value of the contract over the full length of the contract. If there is an option to extend stated explicitly in the contract, then the value of the extension should also be considered in the lifetime value. For example, a contract may be worth £1 million per year and is for a duration of three years; the lifetime value of that contract when it was entered into would be £3 million. If there was an option to extend for an additional 2 years, worth £1 million per year, then the lifetime value of the contract when it was entered into would be £5 million. Unplanned modifications made to the contract during its term are not to be included in this calculation.

Establishing that the existing provider is satisfying the existing contract, and is likely able to satisfy the new contract to a sufficient standard

Once the relevant authority has established that the proposed contracting arrangements are not changing considerably, it must assess whether the existing provider is both:

- satisfying the existing contract to a sufficient standard, according to the detail outlined in the existing contract, and taking into account the key criteria and applying the basic selection criteria

- will likely be able to satisfy the new contract to a sufficient standard, according to the detail outlined in the new contract, taking into account key criteria and applying the basic selection criteria.

To do this, the relevant authority must decide the relative importance of the key criteria for the service in question, before assessing the existing provider in relation to each of the key criteria.

The relevant authority must be of the opinion, based on its assessments, that the existing provider is satisfying the existing contract and will likely be able to satisfy the new contract to a sufficient standard. The relevant authority must also assess whether the existing provider is continuing to meet the basic selection criteria.

If direct award process C is not applicable because the proposed contracting arrangements are changing considerably from the existing contract, or the existing provider is not satisfying the existing contract or is not likely to be able to satisfy the new contract, then the relevant authority must follow the most suitable provider process or the competitive process.

Relevant authorities must keep records of these considerations (see [transparency](#)) and the resultant decisions, as they may need to disclose information on the rationale for their decision if a representation is made (see [standstill period](#)).

17.4.4 The most suitable provider process

The process that must be followed when awarding a contract under the most suitable provider process is defined in Regulations 6(6) and 10.

The relevant authority is able to identify the most suitable provider without running a competitive exercise.

This provider selection process is designed to allow relevant authorities to make an assessment on which provider (or group of providers) is most suitable to deliver the proposed contracting arrangements based on consideration of the key criteria and the basic selection criteria, and to award a contract without running a competitive exercise.

This provider selection process gives relevant authorities a mechanism for reasonable and proportionate decision-making without running a competitive exercise. It is suitable for circumstances where a relevant authority is of the view, taking into account likely providers and all relevant information available to it at the time (see [provider landscape](#)), that it is likely to be able to identify the most suitable provider to deliver the health care services to the relevant population (local/regional/national). Relevant authorities are advised to follow this provider selection approach only when they are confident that they can, acting reasonably, clearly identify all likely providers capable of providing the health care services and passing any key criterion or sub-criterion which has been designated as pass/fail.

The most suitable provider process must not be used to conclude a framework agreement or to award a contract based on a framework agreement.

Following this provider selection process

This provider selection process may be followed where any of the following apply:

- the relevant authority is not required to follow direct award processes A or B
- the relevant authority is changing an existing contracting arrangement considerably (such that it must not be continued under direct award process C)
- a new service is being arranged
- the existing provider no longer wants to provide the services
- the relevant authority wants to consider potential providers (even where the proposed contracting arrangements are not changing considerably or otherwise), as this is in the best interest of people who use the service, but there is no benefit to running a competitive process or it is disproportionate to do so.

When following the most suitable provider process, the relevant authority:

1. Is advised to take account of any relevant existing contractual provisions relating to termination and contract exit where there is an existing contract with an existing provider in place, whether the existing provider no longer wants to or is no longer able to provide the services,
2. Is advised to consider undertaking a pre-market engagement exercise (see [provider landscape](#)) to help identify all suitable providers and develop the service specification.
3. Must decide the relative importance of each of the key criteria for the service in question (see [key criteria](#)); carefully considering the relative importance of the value criterion. It is advised that for provider selection processes with higher contract values, greater focus is given to value for money and the quality and efficiency of the services to be provided, unless this means the service does not best meet the needs of the population it is serving.
4. Must be of the view that by considering providers it understands are likely to have the ability to deliver services to the relevant (local/regional/national) population, and all relevant information available at the time (see [provider landscape](#)), it is likely able to identify the most suitable provider.
5. Must publish a notice setting out its intention to follow the most suitable provider process (see [transparency](#)). The relevant authority must not proceed to the assessment of likely providers until at least 14 days after the day on which the notice of intention is submitted for publication. The relevant authority is also advised to make potential providers aware that they are being considered for the award of the contract.
6. Is advised to ask the providers it identified as likely to have the ability to deliver services to the relevant (local/regional/national) population, and any provider(s) that responded to the notice publishing the intention to follow the most suitable provider process, for further information that would help decision-making, as necessary.
7. Must identify potential providers that may be the most suitable provider, taking into account the providers it understands are likely to have the ability to deliver services to the relevant (local/regional/national) population and any provider(s) that responded to its notice publishing the intention to follow the most suitable provider process, with reference to the key criteria and the basic selection criteria.
8. Must assess the potential providers identified, considering the key criteria and applying the basic selection criteria in a fair way across them (i.e., on the same basis), and choose the most suitable provider(s) to which to make an award.
9. Must publish a notice containing its intention to award the contract to the chosen provider (see [transparency](#)) and observe the standstill period (see [standstill period](#)).
10. May enter into a contract with the chosen provider after the standstill period has concluded.
11. Must publish a notice confirming the award of the contract within 30 days of the contract being awarded.

Relevant authorities are expected to use their established knowledge of potential providers (see [provider landscape](#)). Relevant authorities may approach providers and ask for information as necessary but are advised to take a proportionate approach.

Relevant authorities must be able to demonstrate that they have understood the alternative providers and reached a reasonable decision when selecting a provider – but this does not need to be via a formal competitive exercise. Relevant authorities must keep robust records of these considerations and follow the relevant transparency requirements (see [transparency](#)). They may need to disclose information on the rationale for their decision if a representation is made (see [standstill period](#)).

If at any point in the most suitable provider process the relevant authority has insufficient information to make an assessment under the most suitable provider process, for example, because it did not receive sufficient information to help its decision-making, it is advised to

use the [competitive process](#). If the relevant authority fails to identify the most suitable provider (or a group of providers), then it must follow the approach for the competitive process to select a provider or abandon the selection process all together if appropriate.

If the relevant authority decides to switch provider selection approach after it published its intended approach notice, then it must abandon the selection process before switching provider selection approach.

Relevant authorities must consider the exclusions in Regulation 20 and apply as appropriate.

Further information

Relevant authorities are expected to develop and maintain a sufficiently detailed knowledge of relevant providers that have the capability to meet the needs of patients within the relevant geographical footprint, which can be used to identify suitable providers (see [provider landscape](#)). Relevant authorities may identify suitable providers through market research, regular engagement with providers, registers of relevant providers or responses to their intention to follow the most suitable provider process notice.

17.4.5 The competitive process

Regulations 6(7) and 11 set out the process that relevant authorities must follow when awarding a contract under the competitive process.

Conducting a competitive procurement exercise

This provider selection process must be followed when the relevant authority is not required to follow direct award processes A or B, and the relevant authority cannot or does not wish to follow direct award process C or the most suitable provider process (for example, because it has not been able to identify a most suitable provider or because it wishes to test the market).

This provider selection process must be used when concluding a framework agreement and may be used when awarding a contract based on a framework agreement, in accordance with the terms of that framework agreement (see [framework agreements](#)).

Following this provider selection process

The steps outlined in the Regulations and the transparency requirements must be adhered to. Relevant authorities may determine additional procedures to be applied in selecting a provider using the competitive process, taking into account the specificities of the services in question to design a bespoke procedure.

When following the competitive process, relevant authorities:

1. Will need to develop a service specification setting out the relevant authority's requirements for the service. In doing so, relevant authorities may consider undertaking a pre-market engagement exercise.
2. Must determine the contract or framework award criteria for the service in question, taking into account the key criteria and applying the basic selection criteria (see [key criteria](#) and basic selection criteria).
3. Must formally advertise the opportunity to bid (see [transparency](#)) and ensure providers are given a reasonable timeframe to respond. The advertisement must include information relating to how bids will be assessed, including whether the different award criteria will be assessed in stages.
4. Must assess any bids received by following the assessment process – that is, against the award criteria, and the exclusion criteria set out in Regulation 20, in a fair way across all bids (i.e., on the same basis). This may be done in stages, in accordance with step 3 above.
5. Must identify the successful provider (or group of providers).

6. Must inform in writing the successful provider (or group of providers) of its intention to award a contract or conclude a framework agreement, and must also inform in writing each unsuccessful provider that its bid has been unsuccessful.
7. Must publish a notice of its intention to award the contract to or conclude a framework agreement with the chosen provider (or group of providers) (see [transparency](#)) and observe the standstill period (see [standstill period](#)).
8. May enter into a contract or conclude a framework agreement with the chosen provider (or group of providers) after the standstill period has concluded.
9. Must publish a notice confirming the award of the contract within 30 days of the contract being awarded.

The award criteria referred to above consist of the basic selection criteria, the key criteria and any other elements of the contract award. These components can be assessed in stages – for example, a provider that does not meet the basic selection criteria may be discounted without further assessment.

Relevant authorities may engage in dialogue or negotiate with all bidders or with shortlisted bidders prior to determining who to award a contract and with a view to improving on initial offers, provided that they do so in a fair and proportionate way and treat all bidders equally.

Relevant authorities must keep records of the procedure followed to select a provider (including details of the bespoke procedure), of how each bid performed against the award criteria and the rationale for selecting the successful bidder (see [transparency](#)). Relevant authorities must consider the exclusions in Regulation 20 and apply as appropriate.

The Trust should follow the tendering procedure described in SFI 16.71 to 16.7.7 when implementing the PSR Competitive Process.

17.5 Framework agreements

Framework agreements are defined in Regulation 16.

Relevant authorities may establish framework agreements under the PSR to arrange health care services in scope of the regime (or that are categorised as mixed procurements within the regime).

What is a framework agreement?

Framework agreements for the purposes of this regime are agreements in relation to health care services in scope of this regime between one or more relevant authorities and one or more providers. Framework agreements set out the terms and conditions based on which the provider will enter into one or more contracts with a relevant authority, during the period the framework agreement is in place.

The relevant authority (or relevant authorities) that may award contracts based on the framework agreement must be identified in the framework agreement (either by name or by describing the type of relevant authority), and contracts awarded based on a framework agreement must only be between the relevant authority (or relevant authorities) identified in the framework agreement and a provider that is party to the framework agreement.

The length of a framework agreement must not exceed four years, other than in exceptional cases where the relevant authority is satisfied that the subject-matter of the framework agreement justifies a longer term.

The terms and conditions of a framework agreement may be modified in line with the requirements for contract modification for this regime (see [contract modifications](#)).

Concluding a framework agreement

The process that must be followed when concluding a framework agreement is set out in Regulation 16.

The process that must be followed when adding providers to an existing framework agreement is set out in Regulation 17.

When concluding a framework agreement, relevant authorities must use the competitive process to select provider(s) to be party to the framework agreement.

During the term of a framework agreement, providers may be added to a framework agreement. Relevant authorities are advised to set out how and when this might be done in the terms and conditions of that framework agreement. Relevant authorities must use the approach for the competitive process to add providers to the framework agreement, and relevant authorities are advised to use the same award criteria as when setting up the original framework agreement.

When concluding a framework agreement, relevant authorities must set out the duration of the framework agreement and which relevant authorities can award contracts based on the framework agreement. Relevant authorities are expected to set out:

- the terms for awarding a contract based on the framework agreement
- how the framework agreement will operate
- how the call-off procedures will operate (see below)
- how new providers or relevant authorities can be added to the framework agreement at a later date (if applicable).

Relevant authorities must not conclude a framework agreement with a provider and may exclude a provider from the procurement process if the provider meets the exclusion criteria detailed in Regulation 20. Relevant authorities are advised to set out in the terms and conditions of their framework agreement that they may remove a provider from the framework agreement if that provider meets the exclusion criteria.

Awarding contracts based on a framework agreement

The processes that must be followed when awarding a contract based on a framework agreement are defined in Regulation 18.

Only relevant authorities that are identified as being able to award contracts under the framework agreement may award contracts to providers that are party to that same framework agreement. Relevant authorities may decide that the award criteria for awarding contracts under a framework agreement are different from those for concluding the framework.

Relevant authorities must award a contract under a framework agreement in accordance with the terms and conditions of that framework agreement.

If awarding a contract based on a framework agreement, relevant authorities may do so in one of the following ways:

- without competition if the framework agreement only includes one provider (via a 'direct award')
- if the framework agreement includes more than one provider, choose whether to award the contract:
 - without a further competition (via 'direct award'), or
 - by following the competitive process (via a 'mini-competition').

In all these scenarios, relevant authorities must make decisions in accordance with the framework agreement.

If awarding a contract based on a framework agreement without competition (via a 'direct award'), relevant authorities must:

- publish a notice confirming the decision notice within 30 days of the contract being awarded (see [transparency section](#) and [Annex B](#)).

If awarding a contract based on a framework agreement following a competitive process (via a 'mini-competition'), relevant authorities must:

- follow the process for the competitive process, substituting step 2 (the step advertising the opportunity to the market' with 'invite providers party to the framework to submit an offer'
- follow the terms and conditions of the framework agreement, including how competitions must run when awarding a contract based on that framework agreement (if this is set out)
- follow the relevant transparency requirements (see [transparency section](#) and [Annex B](#))
- observe the standstill period as required for the competitive process (see [standstill period](#)).

When awarding a contract from a framework agreement, the term of the contract may exceed the length of the framework agreement.

Contracts awarded from a framework agreement are expected to not exceed the total value of the framework agreement.

17.6 Key criteria

Overview

The PSR key criteria are defined in Regulation 5.

Five key criteria must be considered when making decisions about provider selection under direct award process C, the most suitable provider process, and the competitive process of this regime. [Annex D](#) to this guidance provides detail on what each criterion covers. In summary, these criteria are:

- **Quality and innovation**, that is the need to ensure good quality services and the need to support the potential for the development of new or significantly improved services or processes that will improve the delivery of health care or health outcomes.
- **Improving access, reducing health inequalities and facilitating choice**, that is ensuring accessibility to services and treatments for all eligible patients, improving health inequalities and the ensuring that patients have choice in respect of their health care.
- **Social value**, that is whether what is proposed might improve economic, social and environmental well-being in the geographical area relevant to a proposed contracting arrangement.

Application of key criteria

Relevant authorities must consider each of the key criteria in the regime when making decisions under direct award process C, the most suitable provider process and the competitive process (including when concluding a framework agreement and when awarding a contract based on a framework agreement using the competitive process). Under these processes, relevant authorities must be able to justify their decisions when following a provider selection process in relation to the key criteria and keep a record of this. Further detail on recording decision-making and transparency can be found in the transparency section.

How relevant authorities assess providers against the key criteria, including what evidence they consider, may vary according to the service they want to procure. A relevant authority may wish to address specific priorities; these are expected to be described as part of the key criteria and can be considered when deciding the relative importance of the key criteria.

Relevant authorities must be aware that equalities duties in the [Equality Act 2010](#), including the [Public Sector Equality Duty](#), are relevant to all criteria and due regard to these requirements must be given when considering each criterion.

Balancing the key criteria

The relative importance of the key criteria is not predetermined by the Regulations or this guidance and there is no prescribed hierarchy or weighting for each criterion. Relevant authorities must decide the relative importance of the key criteria for each decision they make under this regime, based on the proposed contracting arrangements and what they are seeking to achieve from them/the services, including scenarios where a particular criterion is 'pass/fail', or where certain key criteria are of equal importance. All criteria must be considered, and none is expected to be discounted when following a provider selection process.

The regime does not specify how relevant authorities must balance the key criteria; however, relevant authorities are expected to be aware of wider requirements or duties when considering procurement decisions. For example, NHS England, ICBs, NHS trusts and NHS foundation trusts are expected to adhere to NHS England's net zero ambitions and its social value commitment, and the need to ensure value for money when arranging health care services (this list is not exhaustive). The flexibilities offered by the regime do not mean that relevant authorities are exempt from complying with their other obligations.

Relevant authorities are advised to consider particularly carefully the relative importance of the value criterion when making assessments under the most suitable provider process.

It is advised that for provider selection processes with higher contract values, greater focus is given to value for money and the quality and efficiency of the services to be provided, unless this means the service does not best meet the needs of the population it is serving.

When making assessments against the key criteria under direct award process C and the most suitable provider process, relevant authorities are expected to use information and evidence from a range of sources, as well as their knowledge and experience of working with providers. They can ask providers for further information to assist with this assessment if they wish. The explanation of each criterion in [Annex D](#) includes examples of relevant sources where appropriate.

When following the competitive process relevant authorities must only use the information contained in the bid to assess the bid. Relevant authorities may set out in their tender documents that wilful misrepresentation of a bid by a provider will result in exclusion from the provider selection process.

Relevant authorities must justify and record how they have given relative importance to each of the key criteria for the service they are arranging. Further detail on recording decision-making can be found in the transparency section.

Relevant authorities must ensure they meet other relevant statutory duties when deciding the relative importance of each of the criteria, including normal public law decision-making principles around reasonableness of decisions. Relevant authorities are also expected to consider other national and local policies and non-statutory guidance when deciding the relative importance of each of the criteria.

17.7 Transparency

The relevant information keeping requirements are detailed in Regulation 24.

The requirements for the transparency notices, including the content of the notices, are detailed in Schedules 2 to 15.

Relevant authorities are required to evidence that they have properly exercised the responsibilities and flexibilities conferred on them by the regime, to ensure that there is proper

scrutiny and accountability of decisions made about health care services. This section sets out the steps that relevant authorities must take to be transparent in their decision-making under this regime.

There are several elements to the transparency process under this regime – these apply differently according to which decision-making process is being applied. [Annex B](#) provides detailed information about the transparency requirements for all processes under the PSR.

Relevant authorities must follow the transparency process relevant to the approach being followed.

In all circumstances, relevant authorities must keep internal records of their decision-making processes and must publish notices confirming their decision to award a contract.

When following the most suitable provider process relevant authorities must also make their intentions clear in advance by issuing a notice.

When following direct award process C, the most suitable provider process and the competitive process (including when concluding a framework agreement and when awarding a contract based on a framework agreement using the competitive process) relevant authorities must also communicate their decision to award a contract publicly and observe a standstill period during which representations can be made. The standstill period must end before contracts can be awarded.

All transparency notices referred to in this section must be published using the UK e-notification service, the [Find a Tender Service \(FTS\)](#). The information that must be included in the transparency notices is set out in [Annex B](#) and relevant authorities should refer to the separate guide to publishing these notices on FTS.

Relevant authorities can publish information on their decision-making in other places as well if they wish, such as [Contracts Finder](#).

In addition to the transparency notices required under the various provider selection processes, relevant authorities must publish transparency notices when they are abandoning a provider selection process, when making an urgent award or contract modification or when undertaking certain non-urgent contract modifications.

17.8 Keeping records of decision-making

The relevant information requirements are detailed in Regulation 24. Relevant authorities must make and keep clear records detailing their decision-making process and rationale. This must be done for all provider selection processes (direct award process A, B and C, the most suitable provider process, and the competitive process), when concluding a framework agreement, when awarding a contract based on a framework agreement without competition, and when awarding a contract based on a framework agreement following the competitive process. This includes where a provider selection process was abandoned or where the relevant authority decided to return to an earlier step in the process. Records must include:

- name of the provider to which the contract has been awarded or the name of any provider who is a party to a framework agreement and the address of their registered office or principal place of business
- the decision-making process followed to select a provider(s), including details of the procedure used when the competitive process is followed
- the reasons for these decisions
- details of the individual/individuals making the decision
- any declared or potential conflicts of interest for individuals involved in decision-making and how these were managed
- where a procurement is abandoned, the date on which it is abandoned.

We expect that records are kept when contracting for mixed procurements, including how the procurement meets the requirements for mixed procurements under this regime.

When following direct award process C or the most suitable provider process, records must also include:

- a description of the way in which the key criteria (e.g., weighting, hierarchy, or more informal description of importance) were taken into account, and how the basic selection criteria were assessed when making decisions. We expect that this includes the relative importance of the key criteria that the relevant authority used to make a decision, the rationale for the relative importance of the key criteria, and the rationale for choosing the provider with reference to the key criteria.

When following the competitive process (including when concluding a framework agreement or when awarding a contract based on a framework agreement following the competitive process), records must also include:

- a description of the way in which the key criteria were taken into account, the basic selection criteria were assessed, and contract or framework award criteria were evaluated when making a decision. We expect that this includes the relative importance of the key criteria that the relevant authority used to make a decision, the rationale for the relative importance of the key criteria, and the rationale for choosing the provider with reference to the key criteria.

When concluding a framework agreement, we expect that records include the terms and conditions that will be laid down by the framework agreement, and include which relevant authorities are part of the framework agreement. When awarding a contract from a framework agreement, we expect that records include which framework agreement the contract is being awarded from.

Relevant authorities must be aware that they may need to disclose information on the rationale for their decision making under the Regulations if a representation is made (see [standstill period](#)). We expect relevant authorities to keep their records for a period of time that is in line with their organisation's record keeping policies and any applicable legislation. Relevant authorities are also expected to keep records of their decisions and decision-making processes when modifying a contract.

Keeping records of decision-making in urgent circumstances

When awarding or modifying a contract in an urgent circumstance, relevant authorities must make and keep clear records detailing their decision-making process and rationale. Records must include:

- justification for using the urgent circumstances exemption
- name of the provider(s) to which the contract has been awarded and the address of its registered office or principal place of business
- the approach taken to select a provider and the process followed (i.e., urgent circumstance)
- details of the individual/individuals making the decision
- any declared or potential conflicts of interest of individuals making the decision (not including individual names) and how these were managed.

We expect that records are kept when contracting for mixed procurements, including how the procurement meets the requirements for mixed procurements under this regime.

17.9 Annual summary

The annual summary requirements are set out in Regulation 25.

Relevant authorities must publish a summary of their application of the PSR annually online (e.g., via the relevant authority's annual reports or annual governance statement). We expect the first annual summary to relate to contracts awarded using the PSR between 1 January 2024 – 31 March 2025, and we expect this to be published no later than six months following the end of 2024/2025 financial year. Following the first annual summary, all other annual summaries must be published no later than six months following the end of the financial year it relates to.

This must include, in the year to which the summary relates, the:

- number of contracts directly awarded under direct award processes A, B or C
- number of contracts awarded under the most suitable provider process
- number of contracts awarded under the competitive process
- number of framework agreements concluded
- number of contracts awarded based on a framework agreement
- number of urgent contracts awarded and urgent modifications (in line with the [urgent awards or contract modifications section](#))
- number of new providers awarded contracts
- number of providers who ceased to hold any contracts with the relevant authority
- details of representations received, including:
 - the number of representations received in writing and during the standstill period in accordance with Regulation 12(3)
 - summary of the outcome of all representations received and of the nature and impact of those representations.

In addition, relevant authorities are expected to publish:

- total number of providers the relevant authority is currently contracted with
- details of any PSR review panel reviews:
 - number of requests for consideration received by the PSR review panel
 - number of requests accepted and rejected by the PSR review panel for consideration
 - number of times where the PSR review panel advised the relevant authority to re-run or go back to an earlier step in a provider selection process under the PSR, and the number of times the advice was followed.

17.10 Monitoring requirements

The monitoring requirements are set out in Regulation 26.

Relevant authorities must monitor their compliance with the Regulations. The results of the monitoring must be published online annually (and may be integrated into other annual reporting requirements) and include processes, decisions made under the PSR, contract modifications, and declaration and management of conflicts of interests. Relevant authorities may use internal auditors to fulfil these requirements.

If a compliance report finds instance(s) of non-compliance, relevant authorities must put in place actions to address this issue and to improve adherence with the regime.
